evilevilcouch@gmail.com: hehe
evilevilcouch@gmail.com: man lol it was interesting
evilevilcouch@gmail.com: my step dad was really concerned last night
evilevilcouch@gmail.com: my speech was slurred and my hand and leg kept twitching
evilevilcouch@gmail.com: i couldn't stop flexing my hand/scrunching my fingers then expanding them
evilevilcouch@gmail.com: my vision was really weird
evilevilcouch@gmail.com: i could hear what he was saying, but when he asked questions it sorta hurt my head
evilevilcouch@gmail.com: well, that's how it was in the beginning
evilevilcouch@gmail.com: when i didn't have a lack of control over my movement
evilevilcouch@gmail.com: but when i couldn't control my movement (face, hand, leg) it was hard for me to reply
evilevilcouch@gmail.com: my eyes would open and close weird and my eyes rolled around a bit?
evilevilcouch@gmail.com: it's like i was there, but not
evilevilcouch@gmail.com: i couldn't really fully respond and would be staring out randomly
evilevilcouch@gmail.com: i dunno
evilevilcouch@gmail.com: it's sorta like having a bunch of white noise fill up your consciousness? lol
evilevilcouch@gmail.com: like my vision was weird
evilevilcouch@gmail.com: and my interacting with my environment had that white noise filter sorta
evilevilcouch@gmail.com: i dunno
evilevilcouch@gmail.com: and my trying to control my movement — like...there was a lot of white noise to go through for me to make my hand not move

evilevilcouch@gmail.com: but it doesn't get that bad all the time
evilevilcouch@gmail.com: haha
